Executive Summary

The Government of India has taken up the task of universalizing the elementary education in the country. This is being accomplished through the programme called Sarva Shiksha Abhiyan (SSA) by ensuring eight years schooling for every child of 6 to 14 years with the maintenance of quality along with universal retention by the year 2010. As a part of assessment of programme's progress, State Project Directorate(SPD), SSA, Uttar Pradesh has entrusted the Giri Institute of Development Studies, Lucknow to estimate the out of school children in rural areas of Lucknow and Kanpur Nagar.

The study results are based in field based data from 1999 households of 15 villages of four Gram Panchayats falling in four blocks two from each of the districts of Lucknow and Kanpur Nagar. The households in sample villages consisting of school going age children (6 to 14 years) belong to the Hindu and Muslim religions only. The study estimates the number of out of school children along with their existing enrollment taking into consideration their religion, caste and sub-caste group and also income and occupation of their family in order to probe the association between these and children's absence from the school.

The findings of field survey data revealed 98.40 per cent of the total enrolled children in the age group of 6 to 14 years. Thus, only 2.60 per cent children of school going age were found out of school. This appears to be a reasonably good performance on the part of SSA programme in the State. Among the total out of school children around one-fourth have never gone to school and three-fourths were found to be dropouts. Considering the lower share of out of school children in the total of school going age children, we can expect for achieving the task of universalisation of elementary education in stipulated time frame in the State.

In spite of satisfactory enrollment rate and lower proportion of out of school children at primary school level, the road for universalizing the elementary education appears to be long and arduous in the state as it has been again revealed from field based data that more than 30 per cent of the enrolled students have not been found going to school presently. These are the students, enrolled under the school enrollment drives and teachers have entered their names as they are eligible children. But such students are not found to be interested in attending school because of their personal disinterest in studies as well as for family reasons. The most important task is to check the high proportion of such students in total enrolled children in primary and upper primary schools of the state.

A gender-wise analysis of out of school children showed almost same share of boys and girls among children found never attending school. But share of boys in dropouts has been far higher than girls. The religion wise analysis showed higher proportion of out of school children among Hindus than Muslims. But at the same time the share of children not attending school despite their enrollment has been higher among Muslim than Hindu children.

An analysis of children found never attending school showed none of child from upper caste. They belonged to SC and OBC categories. Moreover, number of never school attending among SC's was double the number of such students in OBC category. Within the OBC's never attending children belonged to Yadav and Nai (barber) sub-caste including Muslim OBC's. Thus, the analysis showed an impact of existing caste structure on the enrollment of children in the schools. The poverty level of households did not showed any impact on never school attending students, as the number of such students belong equally to BPL as well as APL families in the study area. All the never school going children belong to the cultivators, agricultural labourers, non agricultural labourers and self employed in almost equal number in the sample villages.

An enquiry into the reasons for never attending the schools by the parents as well as children revealed that they prefer to remain busy in households work and other activities like helping their parents in agricultural activities. Some of them have also reported poverty and long distance of schools as the reasons for not going to the school. The reasons for dropout and not going to school despite present enrollment were also found to be almost same. All this calls for a sustained effort for orienting the children as well as their parents through different means for taking up elementary education seriously.

INTRODUCTION

1. Introduction

The Government of India has launched a nation-wide programme of universalizing the elementary education in order to ensure that all children of 6 to 14 years of age are enrolled in school, stay in school from the elementary stage and receive education to satisfactory level. The programme called Sarva Shiksha Abhiyan (SSA) aims at ensuring that every child in the age group of 6 to 14 receives eight years of schooling with satisfactory quality and universal retention by the year 2010. In the light of ongoing massive nation-wide programme of universalizing elementary education, the State Project Directorate (SPD), Sarva Shiksha Abhiyan (SSA), Uttar Pradesh has commissioned the study to the Giri Institute of Development Studies, Lucknow to assess the out of school children in the rural areas of the districts of Lucknow and Kanpur Nagar of Uttar Pradesh.

2. Methodology

The children belonging to the age group of 6-14 years in the sample villages of both the districts have been identified on the basis of door-to-door survey. From the children of this age group, three types of children are further identified. These are:

- (i) Children (6-14 years) who have never attended school
- (ii) Children (6-14 years) who have attended school but subsequently left going to school (drop-outs)
- (iii) Children (6-14 years) who are enrolled as students in different classes, primary and upper primary, presently not going to school. The students under this category have been enrolled under the school enrolment drives and teachers have entered their names in the school register as they are eligible children. These are the children who were not found attending schools on the day of our visit and their absence has been recorded for more than one week.

The present study makes an estimate of children falling in each of these three categories in the sample area of both the districts. The study also identifies the 'nowhere children' in the sample districts. Nowhere children in the age group of 6 to 14 years are neither going to school nor working. These are found out by clubbing dropout students and children who have never been to school in the age group.

The estimation of out of school children has been made according to their gender, religion and caste in order to assess the impact of these factors on their absence from the school.

All the relevant information in this connection has been collected from each of the village households on a pre-structured questionnaire through door-to-door survey by the qualified and trained field staff of the Institute. The information of out of school children collected from the households has been further verified from the 'Bal Gadna Register' of the schools. The report includes the lists of all 6-14 years age children, out of school children along with the reasons of being out of school in the sample. The variation in the number of out of school childfen between our survey and SSA survey has also been presented in the lists.

3. Sampling

The field sample for collecting information on out of school children is taken from two village panchayats/blocks from each of the districts. Two blocks with lowest literacy levels have been selected for this purpose in each of the districts. From each of the four blocks, in both the districts, one gram panchayat is further selected randomly. The study identified 1999 household belonging to 15 villages falling in 4 gram panchayats from four blocks of two districts following the above sampling procedure. Every household of the selected gram panchayat was visited by the team members to collect the relevant information. Table 1 presents the selected blocks, gram panchayats, their villages and number of households in each category.

4. Children between the age group of 6-14 years

The total number of children belonging to the age group of 6-14 years in the selected blocks of Lucknow and Kanpur Nagar district is presented in Table. 2.

Table No. 2: District and Block-wise No. of children in Age Group of 6-14

Block/District	GIDS Survey	SSA Household Survey	Difference

kalyanpur	660	660	-
Ghatampur	503	492	+11
KANPUR NAGAR	1163	1152	+11

As per the survey results of the GIDS, a total of 113 children are not found in the age group of 6-14 years in the sample villages of both the blocks of Lucknow district. A shortfall of 36 children in Mall bloc and 77 children in Gosaiganj block is recorded as per our results. As against this, in case of Kanpur Nagar, a total of 11 children have not been reported in SSA survey in Ghatampur block. The village blocks and district- wise tables (table 3 &4) showing these shortfalls are also presented along with this. The detailed list of each child of 6-14 years age along with the father's name of respective child has also been annexed at the end of this report.

5. Out of school children of age group 6-14 years

The total number of out of school children, in the age group of 6-14 years in the sample villages, blocks of both the districts, i.e. Lucknow and Kanpur Nagar is presented in Tables 4 to Table 6. The list of given children along with their father's name and the reasons for being out of school is also presented in the annexure at the end of the report.

As per results of SSA survey, no out of school child was found in the sample villages in both the districts. As against this total 31 out of school children were identified in Lucknow and 6 in Kanpur Nagar as our survey results. The details are presented in Tables 5 to 7.

6. Religion-wise Composition of Households

The sample households of both the districts belonged to Hindu and Muslim religions. Most of them (93.70 per cent) are Hindus and rest 6.30 per cent belong to the Muslim religion. A relatively higher proportion of Muslims (8.58 per cent) households was found in Kanpur Nagar. The share of Muslim was recorded to be only 3.79 per cent in the sample households of Lucknow district (Table 8).

Table 8: Classification of Households According to the Religion

District	Hindu	Muslim	Total
Lucknow	915 (96.21)	36 (3.79)	951 (100.00)
Kanpur Nagar	958 (91.42)	90 (8.58)	1048 (100.00)
Total	1873 (93.70)	126 (6.30)	1999 (100.00)

Source: Field Survey

7. Caste Composition of Households

The caste composition in the sample districts indicated that more than 44 per cent households were Scheduled Castes households, 40.65 per cent OBCs and only 15.12 per cent households belonged to the general category among Hindus (Table 9). Among Muslims, around one-third households belonged to the OBC category and rest of the households to the general category.

Table 9: Classification of Households According to Caste

District		Hindu H	Iouseholds		Muslim Households			Grand
District	General	OBC	SC	Total	OBC	Others	Total	Total
Lucknow	108	271	536	915(100.0)	24(04.44)	2(5.66)	36(100.0)	951
Lucknow	(11.80)	(29.62)	(58.58)	(96.21)	34(94.44)	2(5.66)	(3.79)	(100.0)
Kanpur	175	400(51.20)	292	957(100.0)	8(8,79)	83(91.21)	91(100.0)	1048

Total	283	761	828	1872(100.0)	42(22.07)	95(66 02)	127(100.0)	1999
Total	(15.12)	(40.65)	(44.23)	(93.65)	42(33.07)	85(66.93)	(6.35)	(100.0)

Source: Field Survey

A district-wise caste composition further showed 58.58 per cent Scheduled Caste households in the sample area of Lucknow district. The OBC households constituted 29.62 per cent and the households of general category were merely 11.80 per cent of the total sample households. Thus, the highest proportion of SC household existed in Lucknow. As against this, only 30.51 per cent sample households belonged to the Scheduled Caste category and 18.29 per cent households to the general category. The highest number of households (51.20 per cent) belonged to the OBC category in Kanpur Nagar.

Among Muslims, out of the sample households of Lucknow district, more than 94 per cent belonged to the OBC category. Contrary to this, OBC households constituted only 8.79 per cent among Muslims of Kanpur Nagar.

8. Sub-Castewise Composition of Households

A sub-castewise analysis of households in sample villages showed the highest number of Brahmin households (87.63 per cent) in the general category in both the districts. Among OBCs the highest (45.73 per cent) households belonged to Yadava sub-caste followed by kurmis (Table 10). Kumhars were the third largest number of households in both the sample districts.

Table 10: Classification of Household According To Sub-Caste

Source: Based on field data

The most predominant caste belonged to Raidas and Pasi sub-caste in the SC category of the sample. Among Muslims, most of the households (65.35 per cent) belonged to the general category comprising of Pathans. The rest of the sample households belonged the OBC category, consisting of 24.60 per cent Ansari households and remaining 10.25 per cent Nai Muslim community.

9. BPL and APL Households

An estimation of overall poverty level among sample households indicated 22.86 percent of the total households below poverty line. It is further revealed from Table 11 that a 23.55 per cent households fall below poverty line in Lucknow as compared to 22.23 per cent households in Kanpur Nagar district.

Table 11: Poverty and Living Status of Households

District	Total households	Households	Households
		Below Poverty Line	Above
			Poverty Line

Kanpur Nagar	1048(100.00)	233(22.23)	815(77.77)
Total	1999(100.00)	457(22.86)	1542(77.14)

Source: Field Study

10. Land Owned by the Households

Data relating to land owned by sample households presented in Table 12 indicated less than 27 per cent landless households in Lucknow and Kanpur Nagar. A higher number of landless households (36.70 per cent) were identified in Lucknow as against only about 18 per cent landless households in Kanpur Nagar district. The households with land size below one acre was also higher in Lucknow (20.19 per cent) as compared to the household in the same land size category (17.56 per cent) in Kanpur Nagar.

Table 12: Size of Land Owned by the Households

(Acre)

					and the state of t			(

Source: Field Survey

Data also revealed that almost 90 per cent households owned land below 5 acre. A relatively higher proportion of households held land above 5 acre in Kanpur Nagar as compared to Lucknow. The land size more than 10 acre was held by only 0.21 per cent households in Lucknow as against more than 3 per cent among the sample households in Kanpur Nagar.

11. Households and their Annual Income

As per data presented in Table 13 the average annual income of sample households in both the districts turned out to be Rs.51057. In case of Lucknow district, it has been higher (Rs.53892) than the same in Kanpur Nagar where the average annual household income was only Rs.48485. More than 25 per cent households had annual income below Rs.20000 in Lucknow. Whereas only 9.26 per cent household held annual income below Rs.20,000 in Kanpur Nagar.

Table 13: Classification of Household According to the Annual Income

Income (Rupees)	Lucknow H.H.	Kanpur Nagar H.H.	Total H.H.

Per Households (R.s)	53,892	48485	51057

Source: Based on field data

Figures in bracket indicate percentage

On an average, 16.81 per cent households held annul income below Rs.20,000 in the districts of Lucknow and Kanpur Nagar. More than 72 per cent sample households had average annual income less than Rs.50,000 in these districts. Less than 5 per cent households held annual income between Rs.90,000 and Rs.1,00,000. The households having annual income more than Rs.1.0 lakh also constituted less than 5 per cent in the sample area.

12. Population – Sex and Age

Age and sex wise population presented in Table 14, indicates 45.25 per cent females against 54.75 per cent male population in the sample area. A relatively better sex ratio in Kanpur Nagar than Lucknow is also observed among the sample population. Population data has further shown more than 22 per cent population in the age group of 6 to 14 years which is in

the school going age. The share of population in this age group has been higher in Lucknow as compared to Kanpur Nagar. However, the absolute number of children in this age group has been almost same in both the districts as presented in Table 14.

Table 14: Classification of Population According to Sex and Age

Particulars	Lucknow	Kanpur Nagar	Total
Sex:			
Male	2642(55.28)	3135(54.30)	5777(54.75)
Female	2137(44.72)	2638(45.70)	4775(45.25)
Total	4779(100.00)	5773(100.00)	10552(100.00)
Age:			
Below 6 years	645(13.50)	718(12.44)	1363(12.92)
6-14 years	1160(24.27)	1163(20.14)	2323(22.01)
15-39	1963(41.08)	2425(42.01)	4388(41.58)
40-59	724(15.15)	1026(17.77)	1750(16.59)
60 years+	287(6.00)	441(7.64)	728(6.90)
Total	4779(100.00)	5773(100.00)	1052(100.00)

Source: Based on field data

The population below 6 years constituted around 13 per cent of the total in the districts. More than 58 per cent population belonged to the working age group. Only around 7 per cent population was above the age of 60 years.

13. Educational Status of Population

As per survey results, about 33 per cent population in the sample area of both the districts is recorded to be illiterates. The data relating to educational status presented in Table 15 further indicate around 15 per cent population has education below primary school level. Upto primary level education was acquired by only 13 per cent population. But upper primary level educated population constituted more than 10 per cent of the total population in the sample area.

Table 15: Classification of Population According to their Status of Education

Education level	Lucknow	Kanpur Nagar	Total
Illiterate	1818(38.04)	1636(28.34)	3454(32.73)
Below Primary	847(17.72)	688(11.92)	1535(14.55)
Primary	504(10.55)	886(15.35)	1390(13.17)
Upper Primary	850(17.79)	1062(18.40)	1912(18.12)
High School	367(7.68)	742(12.85)	1109(10.51)
Intermediate	223(4.67)	443(7.67)	666(6.31)
Graduate	143(2.99)	262(4.54)	405(3.84)
P.G	15(0.31)	41(0.71)	56(0.54)
Diploma	12(0.25)	13(0.22)	25(0.24)
Total	4779(100.00)	5773(100.00)	10552(100.00)

Source: Based on field data

The percentage share of educated population upto high school and intermediate was far lower than this. Less than four per cent people were graduates and around half per cent had post-graduate level education. A high proportion of illiterate population was identified in Lucknow as compared to Kanpur Nagar.

14. Working Status of the Population

The highest share of the population in the sample area (32.84 per cent) was found to be students followed by working people constituting around 30 per cent of the total population. The third largest segment of population (21.73 per cent) is identified s housewives in the area. The data relating to unemployed population as presented in Table 16 indicated only 2.35 per cent population under this category. Old age and retired population constituted 2.64 per cent of the population. The unemployed population is recorded to be far higher in Lucknow (4.84 per cent) as compared to the same in Kanpur Nagar (0.20 per cent).

Table 16: Classification of Population According to their Working

Working status	Lucknow	Kanpur Nagar	Total
Working	1379(28.86)	1768(30.63)	3147(29.82)

Total	4779(100.00)	5773(100.00)	10552(100.00)

Source: Based on field data

15. Occupational Classification

The highest proportion of the working population is found to be engaged as non-agricultural laborer (31.78 per cent) followed by cultivators (23.83 per cent) in both the districts. The population engaged as agricultural labour turned out to be only 7.79 per cent. The share of non-agricultural Labour in total has been far higher in Lucknow (38.11 per cent) than the same in Kanpur Nagar (26.53 per cent).

Table 17: Classification of Population According to their Occupation

Occupation	Lucknow	Kanpur Nagar	Total
Cultivator	266 (19.29)	484 (87.38)	750 (23.83)
Agriculture Labour	108 (7.83)	137(7.75)	245 (7.79)
Non-agriculture Labour	531 (38.51)	469 (26.53)	1000 (31.78)
Animal Husbandry	104 (7.54)	85 (4.81)	189 (6.01)
Service (Govt.)	134 (9.72)	81 (4.58)	215 (6.83)
Service (Pvt.)	86 (6.24)	85 (4.81)	171 (5.43)
Self Employed	107 (7.76)	289 (16.35)	396 (12.58)
Artisan	31 (2.25)	69 (3.90)	100 (3.18)
Others	12 (0.87)	69 (3.90)	81 (2.57)
Total	1379 (100.00)	1768 (100.00)	3147 (100.00)

Source: Based on field data

More than 16 per cent population was self-employed in Kanpur Nagar whereas less than 8 per cent people engaged themselves as self-employed in Lucknow district. At the same time, a higher proportion of population was employed in private and public sectors in Lucknow as compared to Kanpur Nagar. Engagement in animal husbandry was higher (7.54 per cent) in Lucknow than in Kanpur Nagar (4.81 per cent).

16. Activity Status of 6-14 Years Children

Out of the total children belonging to the 6 to 14 years of age, 98.40 per cent were found to be students. In case of Lucknow, 97.33 per cent children were enrolled in school as against Kanpur Nagar, where 99.40 per cent children of this age were enrolled in the schools. Less than one per cent children were found busy in household work. Table 18 further revealed that a higher proportion of children were engaged in household work in Lucknow compared to Kanpur Nagar. Only three children of this age group were found engaged for income generation, two and one each from the sample villages of Lucknow and Kanpur Nagar respectively.

Table 18: Activity Status of Children in the Age- group of 6-14 years

Particulars	Lucknow	Kanpur Nagar	Total
Student	1129(97.33)	1151(99.48)	2280(98.40)
Household work	17(1.47)	5(0.43)	22 (0.95)
Work for income generation	2(0.17)	1 (0.09)	3 (0.13)
Doing nothing	12(1.03)	0	12(0.52)
Total	1160(100.00)	1157(100.00)	2317(100.00)

Source: Based on field data

The children neither going to school nor engaged in other activity, known as 'no where children' were not found in the sample of Kanpur Nagar. But there were 12 such children (constituting 1.03 per cent of total 6-14 years) in Lucknow.

17. Gender-wise Working Status of Out of School Children

The analysis of the survey results in the sample villages revealed that there were 37 children falling in the category of out of school children out of which 18 children were girls, remaining 18 children were boys. More than 59 per cent of such children were found engaged in household work. Most of them (68.18 per cent) were the girl children.

Table 19: Gender and working status of out of school child 6-14

Dortioulors		Lucknow		K	anpur Naga	ır	Total				
Particulars	Male	Female	Total	Male	Female	Total	Male	Female	Total

generation	(13.33)		(6.45)	(33.33)		(16.67)	(16.67)	0	(8.11)		
Doing nothing	8	4	12	0	0	0	8	4	12		
	(53.34)	(25.00)	(38.71)				(44.44)	(21.05)	(32.43)		
Total	15	16	31	3	3	6	18	19	37		
	(100.0)	(100.0)	(100.0)	(100.0)	(100.0)	(100.0)	(100.0)	(100.0)	(100.0)		

From the total out of school children, 32.43 per cent were found to be doing nothing. These were the 'no where children' neither working for income generation nor engaged in household activities. Most of such children (66.33 per cent) were boys. Only 8.11 per cent of the total out of school children were working for income generation in the sample villages. None of them was female, all were boys. From the total 37 out of school children, 31 belonged to Lucknow. Only 6 such children were from the sample villages of Kanpur Nagar district.

18. Religion-wise Out of School Children

Religion-wise picture of enrolled, never enrolled and drop out children and also children not going to school presently in the sample districts is presented in Table 20. A combined result of both the districts indicated 98.41 per cent enrolment of total children belonging to the age group of 6-14 years. A higher enrolment of 99.48 per cent is found in Kanpur Nagar as compared to Lucknow having 97.33 per cent enrolled children in this age group. Religion-wise enrolment has further showed a higher enrolment of Muslim children in both the districts. But in case of girl children a lower enrolment percentage was recorded among Muslim girls s compared to Hindu girl children in Lucknow and Kanpur Nagar. Overall result of enrolment among boys and girls, irrespective of religious groups, presented higher enrolment percentage among girl children in both districts.

Out of total children in 6-14 age group, 0.39 per cent children identified who were never enrolled. These were recorded to be higher (0.52 per cent) in Lucknow as against Kanpur Nagar having 0.26 per cent of the total 6-14 years children. A higher percentage of never enrolled girl children was recorded in both the districts. However, a lower percentage of out of school Hindu girl children was recorded in Lucknow. In case of Kanpur Nagar the same was higher among Hindu girls as compared to the Muslim girls. An overall high percentage of out of school children was recorded among Hindus children then Muslims.

The combined proportion of drop out children constituted 1.22 per cent of total enrolled children in both districts. Among Muslim there was no drop out child. Among Hindus, it was recorded to be higher among male children than females.

The children enrolled but not going to school frequently have constituted around 30 per cent of the total enrolled children. Such students turned out to be far higher (36.72 per cent) among Muslim than Hindus (29.63 per cent). Further, a higher percentage of girl students belonged to this category in both the religious groups.

19. Caste-wise Out of School Children

A caste-wise analysis of data relating to out of school children presented in Table 21, presents caste-wise information of total number of children (6-14 years), their enrolment, never enrolled children, drop-outs and the children presently not going to school. Out of total 2286 enrolled children in the sample area of the study, 9 children (0.39 per cent) were found never enrolled. From these none was found from general category. About 67 per cent of total never school going children belonged to the Scheduled Castes category and remaining 33 per cent were from OBC group. In case of drop out children also, out of 28 (1.22 per cent), such students none was from general category and majority of them were from Scheduled Castes.

Source: Primary data base

Within the category of Scheduled Castes children 0.62 per cent of total have never gone to school and 1.86 per cent drop out students. In case of OBC, 0.28 per cent children have never gone to school and 0.93 per cent were drop out children. The percentage of drop out children has been higher among girls than boys in both the categories. The percentage of never enrolled children was higher among male children in case of OBCs. But it was higher among girl children in SC category.

Out of total enrolled children of 6-14 years age, more than 30 per cent students were not present in the school. In fact there are the children who are enrolled for name sake for various reasons. These are frequent defaulters in terms of presence in the school. Their knowledge in terms of reading and writing skills has been found to be almost nil. They are equally bad like out of school children in terms of their reading and writing skill development. The proportion of SC students not going to school, despite their enrolment, has been highest (35.82 per cent) as compared to OBC and general category students. A gender-wise analysis of same data further indicated that a higher proportion of girl students were found who did not go to school despite their enrolment among SC

and OBC students. However, among general category a higher percentage of enrolled boys did not go to school.

20. Children Never Gone to School of Different Sub-Castes

A sub-caste-wise analysis of children (6-14 years) never gone to school as shown in Table 22 indicated the highest proportion of such children among nais (10.0 per cent) followed by nuts (6.66 per cent) of Hindu community of the sample villages. The proportion of such children has been higher, i.e., 20 per cent among total Muslim OBC children.

The gender-wise distribution of such children further showed that most of children who have never gone to school were girls. Among Hindu sub-caste 66.67 per cent never school going children were girls. Where all these were girls among Muslim OBC children.

21. Drop-out Children Among Sub-Castes

In case of drop out children the highest drop out proportion was recorded among Kumhar sub-caste of OBC (14.28per cent). It was followed nais and Yadavas among OBCs.

The proportion of drop out children has been lower among SC households as compared to OBCs. However, the highest proportion of drop out is recorded (3.80 per cent) among pasi sub-caste of SCs. It was followed by nuts.

The number of drop out male children has been more than double the number of female drop out children among OBC households. Among SC children also, the number of male drop outs has been far higher (89 per cent) than female drop outs.

22. Sub-Caste-wise Children Not Going to School

A sub-caste-wise analysis of students who are not going to school presently despite their enrolment is presented in Table 24. Around 18 per cent to about 42 per cent such students belonging to Brahmin and Thakur sub-caste of general category were not attending the school. The proportion of such students has been even higher among different sub-castes of OBCs. The highest percentage of Kurmi boys and Nai girls were not attending the school. The proportion of presently not going to school children varied from 30 per cent to 33 per cent among Yadavas, the most predominant sub-caste of OBCs in our sample villages. A higher proportion of Yadav student did not attend school presently in Lucknow than Kanpur Nagar.

23. Never School Going Children and their Family Occupation

Almost an equal number of never school attending children belonged to the families having occupation as cultivator, agricultural labour, non-agricultural labour and self-employment. The families having occupation as non-agricultural labour had a relatively higher number of never school going children as presented in Table 25.

Table 25: Classification of Never School Going Children According to their family Occupation

District / Occupation	Cultivator	Agricultural Labour	Non- Agricultural	Self- Employment	Total
Lucknow	1 (16.66)	(33.33)	1 (16.66)	(33.33)	6 (100.00)
Kanpur	(33.33)	0 (0.00)	(66.66)	0 (0.00)	3 (100.00)
Total	2 (22.22)	2 (22.22)	3 (33.33)	2 (22.22)	9 (100.00)

24. Never School Going Children and their Economic Status

Out of total 9 never school going children, 5 belonged to the families living below poverty line and 4 above the poverty line (Table 26). Thus, there has not been much effect of families' poverty level on the schooling of children in the sample area.

Table 26: Classification of Never School Going Children As Per Poverty Level

Districts/ Status of family	B.P.L	A.P.L	Total
Lucknow	3 (50.00)	3 (50.000	6 (100.00)
Kanpur	2 (66.66)	1 (33.33)	3 (100.00)
Total	5 (55.55)	4 (44.44)	9 (100.00)

Source: Based on field data

The absence of presently enrolled children among SC sub-Castes varied from about 17 per cent among girl Nut students to the highest 60 per cent among Dhanuk male students. In certain sub-caste none of the enrolled girl students found attending school on a regular basis.

In case of Muslims also the absence of presently enrolled students has been a regular practice. Though the absence of 25 per cent to 38 per cent among general category enrolled Muslim students was observed, but it was far higher (69 per cent to 85 per cent) among Ansari boys and girls. In some cases, like among the girls from Nai community, none of the students attended school presently.

25. Reasons for Never Going to School

More than 44 per cent households reported that children in their family are not going to school because they are involved in household work. Table 27 further indicated that more than 22 per cent household did not send their children to school because of poverty and long distant location of school from the residence. The same proportion of households reported that as their school going children are involved in looking after of their siblings in the family, they are not going to school.

Table 27: Reason for Children for Never Going to School

Source: Based on field data Note: Multiple Response.

In case of Kanpur Nagar more than 66 per cent household did not send their children because of their involvement in household work.

26. Reason for Drop-out

The reason for drop-out was again found to be the children's involvement in household work in case of more than 57 per cent of the total sample households. More than 32 per cent children and parents also reported that they stopped going to school as they started working for income generation. About 20 per cent households in Lucknow also reported that children in their families are not able to continue education as they have to help in family agriculture. Low quality education and long distance of school were some more reasons on account of which students stopped going to school in case of 7 per cent to 11 per cent sample households (Table 28).

27. Reasons for Presently Not Attending School

In most of the sample households (38.26 per cent) students were not attending the school as they were involved in household work as reported by their parents. There were number of other reasons for not attending school presently like, involvement in family agriculture, looking after of family younger children, attending marriage functions, etc. Some

have also reported the reasons as irregular teaching in schools, low quality education, presently working for income generation, etc. (Table 29).

Table 29: Reason for presently not attending in school

28. Reasons for Never Going to School (Response from Children)

Out of total responses by the children who never attended school, more than 27 per cent have never gone to school as they do not have interest in studies. Another around 27 per cent did not go as they remained busy for household work. More than 22 per cent respondent children never attended school as they were to remain engaged for looking after their younger siblings. Some 29 per cent respondents attributed reasons, like: schooling is not gainful, parents do not allow to go to school and poor economic conditions, for never going to school.

Major Findings

- 1. The surveyed sample households belonged to only Hindu and Muslim religious. Most of the households (93.70 per cent) are Hindus and rest belong to Muslim religion. The share of Muslim households has been higher (8.58 per cent) in Kanpur Nagar than in Lucknow (3.79 per cent).
- 2. The caste composition in sample districts showed 44 per cent were SC households, 40.65 per cent OBC and only 15.12 per cent households were of general category.
- 3. Among Muslim Households one third belonged to OBC category and rest two third to the general category.
- 4. A sub caste—wise composition showed 87.63 per cent Brahmin among general category. OBCs consisted of highest 45.73 per cent Yadavs followed by Kumis. The Kumhars were the third largest sub-caste house holds in the sample districts. Among the SC category the most of households belonged to Raidas followed by Pasies. Other Sub caste like Dhobi, Dhanuk, Nuts also existed but their members were too less.
- 5. Estimation of poverty level among sample households showed 22.86 per cent households below poverty line. A higher proportion of households (23.55 percent) below poverty line existed in Lucknow than a lower 22.23 per cent in Kanpur Nagar.
- 6. There were about 27 per cent landless households in the sample area of the district. About 19 per cent Households had land below one hectare. The highest number of households (26.61per cent) owned land between 1 hectare to 2.5 hectare. Only 1.70 per cent house hold have more than 10 hectare land size.
- 7. The average annual income of sample households turned out to be Rs 51057. It was higher (Rs 53892) in Lucknow than the same (Rs 48485) in Kanpur Nagar. About 17 per cent households have annual average income below Rs 20,000. More than 72 per cent households have average income less than Rs.50000. Less than 5 per cent households have annual income between Rs 90,000 and Rs 100000. Only less than 5 per cent households held income more than 1 Lakh in the sample area.

- 8. More than 26 Percent population belongs to the age group of 6 to 14 years who are in school going age in the sample area. The population below 6 years constituted around 13 per cent of the total population.
- 9. About 33 Per cent population in the sample area recorded to be illiterate. About 15 per cent population had education below primary school level. Only 13 per cent population acquired education up to primary level and 10 per cent up to upper primary level. The share of educated population up to high second and intermediate was even lower than this. A higher proportion of illiterates was found in the sample area Lucknow than Kanpur Nagar.
- 10. The highest share of population (32.84 per cent) was found to be student followed by working people (29.82 per cent) and house wives (21.73 per cent) in the sample area. The child population consisted of 10.62 per cent. The retired and pensioners were 2.64 per cent and 2.35 per cent were unemployed in the area. The unemployment was recorded to be higher in Lucknow than Kanpur Nagar.
- 11. The highest proportion of the working population (31.78 per cent) has been engaged as non agricultural labour. The second highest working group was Cultivators (23.83 percent) in the sample area. The proportion of self employment has been 12.57 per cent followed by 6.86 per cent persons who were engaged in government services. More than 6 per cent were found engaged in animal husbandry.
- 12. Out of total children of the age group of 6 to 14 years, 98.40 per cent were enrolled in schools. In case of Lucknow, these were only 97.33 per cent against Kanpur Nagar where 99.40 per cent children were enrolled in the schools.
- Out of total children of 6-14 years age, 0.95 per cent were engaged in household work, 0.13 per cent found working for income generation and 0.52 per cent were 'No where children' who were found doing nothing.
- 14. The total number of children in 6-14 age group in the sample area was 2317. Among those 37 (1.6 per cent) were out of school children. The proportion of Out of school children was found 2.67 per cent in Lucknow and only 0.52 per cent in Kanpur Nagar.
- 15. Among the total out of school children in sample area, 59.46 per cent were busy in house hold work, 8.11 per cent were busy for income generation activities and 32.43 per

- cent were doing nothing. Higher proportion girls (78.95 per cent) were engaged in households work.
- 16. A higher enrollment rate found among Muslim children than Hindus in the sample area. But in case of girls a lower enrollment rate was recorded among Muslim in both the districts. However, a higher enrollment among girls than boys, irrespective of their religion, was recorded in the sample area.
- 17. An overall higher percentage of out of school children (1.70 per cent) was recorded among Hindu children than the Muslim children (0.56 per cent).
- 18. The combined share of dropout children constituted 1.22 per cent. Among Muslims There was no drop out child. Among Hindus, children dropout was 1.33 per cent and higher among boys than girls.
- 19. The proportion of never enrolled children was 0.39 per cent in sample area. Among Muslim proportion of such children was higher (0.56 per cent) than Hindus (0.37 per cent). The proportion of never enrolled girls in total never enrolled children was higher in both the religions.
- 20. The children enrolled but not going to school frequently (regular absentees) constituted around 30 per cent of the total enrolled children. Such students were higher (36.72 per cent) among Muslims than Hindus (29.63 per cent). Further a higher percentage of girl students than boys belonged to this category in both the religious groups.
- 21. About 67 per cent of the total never school going children belonged to SC category and remaining 37 per cent were from OBC Category. There was no such child among general Category in the sample area.
- 22. In case of drop out children also, there was no general Category child and most of the drop out children (64 per cent) belonged to SC group and remaining were OBC.
- 23. Within the Category of SC children, 0.62 per cent of total SC children have never gone to school and 1.86 per cent were drop out students.
- 24. In case of OBC, 0.28 per cent children have never gone to school and 0.93 per cent were drop out children.

- 25. Of the total enrolled children of 6-14 years age, 30 per cent of students were not present in the school. These are the frequent defaulter in terms of presence in the school. Their reading and writing skills are found to be as bad as or out of school children.
- 26. The proportion of SC students not going to school despite their enrollment has been highest (35.82 per cent) as compared to OBC and general Category students.
- 27. A higher proportion of girls did not go to school despite their enrollment among SC and OBC students.
- 28. A sub caste wise analysis of children who have never gone to school, showed the highest proportion of Nai (Barbar) and Nut sub caste in total such children in their respective sub caste.
- 29. The highest drop out was found among Kumhars of OBC (14.28 per cent) followed by Nais and Yadavs.
- 30. Around 18 to 42 per cent of students of Brahmins and Thakurs sub caste of general Category were not attending the school. The proportion of such students was even higher among different sub castes of OBCs. Such students among SC sub caste varied from 17 per cent to a maximum of 60 per cent.
- 31. More than 44 per cent households reported that children never gone to school because they were involved in household work. Some 22 percent house holds did not send their children to school because of poverty and long distance of school. The same proportion of households did never send their children to school for looking after their younger siblings in the family.
- 32. About 57 percent households reported that drop out of their children was because of their involvement in household work. In some 32 per cent household parents and children reported that children stopped going to school as they became busy in income generating activities. More than 20 per cent household reported the involvement of their children in family agriculture, resulting into dropout of their children. Low quality education and distance of school has also been the cause of dropout for some 7 to 11 per cent households in the sample area.
- 33. The reason for presently not going to school of more than 38 per cent households has been their children's involved in house hold work. Some other reasons like contribution

in family agriculture, attending marriage functions, looking after younger children in family, irregular teaching in the school, low quality education and involvement in income generating activity by the students have also been attributed to the non attendance of children in the schools.

34. There has not been any significant impact of family poverty level and occupational status on the school going status of children. The children who never attended school, belonged to the BPL as well as APL families and came from different occupational groups of rural households.
